## SUMMARY

Motivated Java and Spring Boot developer with strong backend development skills and hands-on expertise in MySQL, REST APIs, and MVC architecture. Known for writing clean, efficient code, and adapting quickly to new tools and technologies. Seeking an opportunity to contribute to a dynamic engineering team with reliable, scalable solutions.

---

## SKILLS

- **Programming Language:** Java, JavaScript.
  - **Framework & Technologies:** SpringBoot, JPA, REST APIs, Spring Security(JWT).
  - **Database:** Mysql, H2.
  - **Tools & Testing:** GitHub, Maven, Postman, Jira.
  - **Development Methodologies:** Agile, SDLC.
- 

## EDUCATION

### B.E Computer Science Engineering.

K.S.K College of engineering and Technology, Anna University, Kumbakonam.

---

## PROJECTS

### GameStore WebApplication

- Developed an e-commerce application using Spring Boot with JWT-based authentication and secure role-based access.
- Implemented MVC architecture with controllers for games, genres, and user operations.
- Designed MySQL database models for users, games, categories, and admin features.
- Added robust validations, exception handling, and clean API responses to enhance reliability and user experience.

### Recipe Sharing WebApplication

- Developed a Spring Boot-based web app with secure user authentication and recipe management features.
  - Utilized MySQL for structured data storage and implemented MVC architecture for clean, scalable development.
  - Enhanced usability through robust validation and error-handling mechanisms.
- 

## CERTIFICATION

### Java Development – Elysium Academy, Coimbatore.

- Developed strong practical skills in Java, Spring Boot, MySQL, and RESTful API development.
- Built and deployed backend applications featuring authentication, CRUD operations, and secure data handling.
- Gained hands-on experience with Maven for build automation and GitHub for version control.
- Applied HTML, CSS, and JavaScript to support front-end integration with backend services
